

These notes are designed so that you can use them as a guide for teaching or alternatively you can give them to a group of students who will then complete the reading and activities independently or with a partner.

Each set of notes has:

- · An activity grid
- The science content and knowledge
- The science vocabulary in the glossary
- •The answers to the quiz
- · Questions for each chapter to guide reading

There is more than one way to read this book. Here are four examples. No one way is better than the another. You may also like to use the graphic organizers to help guide your reading.

- You can skim through the pages of the entire book, stopping at and studying the diagrams. Then check the glossary to clarify your understanding of any unknown science-related words. This will give you the background science information before you read the story. Then go back and read the story.
- You can read the blurb on the back cover, then jump straight into reading Chapter
 Read the story as if there were no diagrams or bolded words at all. When you have finished, go back and study the diagrams and glossary words to add to your knowledge.

- You can do a combination of both the above. Read the back cover blurb to find out the storyline. Study the initial diagrams. Then read the book, stopping to consolidate your understanding of the science concepts. Check out the bolded words in the glossary if you are unsure of their meaning.
- You can read the book chapter by chapter, stopping and discussing the story and the science as you go.

When you have finished reading, take the test. You should get six out of six. If you aren't sure of an answer, follow the quiz clues at the end of the book.

Now do one or both of the activities. When you have finished these, complete the black line master activities.

Quiz Answers

Ouestion 1:

North, south, east, west, north-east, south-east, south-west and north-west

Question 2:

Birds nest ashore. Sailors could follow birds back to land. Certain birds flew between mainlands. Sailors could follow birds between the mainlands.

Ouestion 3:

Sailors measured the speed of boats by watching objects drift by in the water. Sailors tied a piece of wood to a rope and dropped it over the side of the boat. The rope had knots tied in it at regular intervals which were counted out over a set period.

Question 4:

The clock

Question 5:

Horizontally

Question 6:

Line of sight and landmarks

Study Guide

Chapter 1 – Dreaded School Project – Help!
Chapter 1 introduces the main characters and forms a relationship between them. Read the chapter to find out what the characters are like and what they think of each other.

Chapter 2 - It's in the Stars

Read chapter 2 to find out how Marcus and Flotsam communicate? What does Marcus think of Flotsam? What are some of Marcus's problems? How does Flotsam help Marcus?

Chapter 3 – Looking for a Little Latitude
The word *latitude* is listed in the glossary of scientific words. Look up the meaning on page 69. Use the title as a clue and predict what will happen. Once you complete reading chapter 3, look up the word *latitude* in a dictionary. The title of the chapter has a double meaning. After reading the chapter explain why you think the author gave this title to the chapter.

Chapter 4 – Attitude is Everything

What was Marcus's attitude towards people like at the start of the story? Think about the title of the chapter. What does it mean? Find out how Marcus deals with his attitude.

Chapter 5 - Marcus's Big Mouth

What does Marcus think of his new friend? How has his attitude changed from the start of the story to the end? How do you think the story will end?
